Better Hardwood Flooring has  
made a commitment to  
environmental responsibility

## Better Hardwood Flooring's Commitment to Protecting the Environment

Better Hardwood Flooring has made a commitment to environmental responsibility by ensuring that all materials are purchased from suppliers who are concerned about the preservation of our natural resources. We only purchase raw materials from suppliers who adhere to the highest standards in forestry practices, thus assuring the conservation and replenishment of our forests for many lifetimes to come.

A hardwood floor is a lifetime purchase. Conversely, other floor coverings must be replaced periodically, thus utilizing more energy, man-made materials and taking up landfill space. Wood flooring should be your environmentally smart choice because it is a natural, renewable and biodegradable product.

Wood should be your environmentally smart choice because it is a natural, renewable and biodegradable product.
